Pat Mikkelsen

ON THE COVER: After the morning presentations at the October CCASP advanced workshop, volunteers went to an archaeology site at Bishop Field to practice newly-learned GPS and recording skills. Photograph courtesy of Beth and Chris Padon.

FROM THE PRESIDENT

President's Column: Spring Update

C. Kristina Roper, President

C. Kristina Roper, SCA President

A year ago in Modesto, on the last day of the Annual Meeting, I had a brief conversation with SCA member Kathy Dowdall in the Doubletree Hotel lobby. I mentioned that, in my view, while Native American presence at the annual meetings had increased significantly over the past few years, there still appeared to be a disconnect between archaeologists and Native peoples. We were still segregated in our conversations, parallel playing rather than collaborating. I told Kathy that my goal for the 2010 annual meeting was to promote Native American participation in the core elements of the SCA annual meeting.

I am pleased to report that, with the help of several people including Program Chair Georgia Fox, Wendy Teeter, Desiree Martinez and several other individuals, my goal has been realized. This year's Plenary Session in Riverside focuses on the many challenges we face in cultural heritage management in California. Of the eight participants in the Plenary session, five are Native American. The title of Gregg Castro's

presentation in the Plenary session perhaps encapsulates my goal for this year's meeting best: *Parity at the Table – An Intersection of Values Between the CRM Profession and Indigenous People.*

The challenges of cultural heritage management and access to cultural collections by Indigenous people will be the topic of this year's Keynote Speaker at the Annual Awards Banquet on Friday night, March 19, 2010. Dr. Sven Hakkanson, Jr. is the Executive Director of the Alutiiq Museum in Kodiak, Alaska. In 2007 he was awarded the prestigious McArthur Fellowship in support of his work preserving and reviving ancient traditions and rich heritage of the past of Alutiiq communities in Alaska. Dr. Hakkanson will also be in attendance during the three-day meeting, and I hope many of you will have an opportunity to meet him and learn more of his work with indigenous collections in Alaska and from museums around the world.

Speaking of cultural heritage management, I would like to thank the San Diego Archaeological Center and artist Marie Andersen for designing this year's Archaeology Month Poster honoring California's history and heritage. The central graphic from the poster is reproduced on the cover of the 2010 Annual Meeting Program. I also wish to thank the US Forest Service, Bureau of Land Management, National Park Service, and the Office of Historic Preservation of the California Parks for continuing to provide support for Archaeology Month as well as other important SCA functions.

President's Column: Spring Update, continued

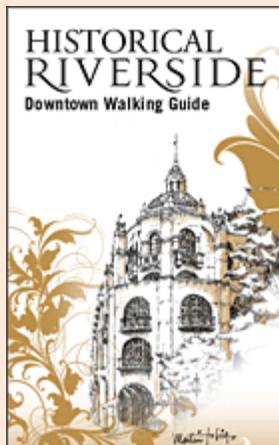

Despite the economic challenges we are currently facing in California and across the country, I am happy to report that the pre-registration numbers for the upcoming Annual Meeting in Riverside are high and more forms are coming in every day. The Mission Inn is fully booked; however, rooms are still available at the \$99/night rate at the Marriott. A highlight of this year's meeting will be the always popular Reception and Silent Auction which will be held at the Mission Inn in the Saint Francis Atrio and adjacent Galleria. Many thanks to SCA members who continue to donate beverages and items for the auction. We couldn't do it without your support.

In a previous column I spoke about the effort of SCA members Michael Sampson and Susan Hector to formulate a legal context in California that mirrors the federal Archaeological Resources Protection Act (ARPA). State Senator Denise Moreno Ducheny has taken up their cause and has recently introduced legislation, now referred to as SB 1034 (the California Public Lands Archaeological Resources Protection Act). SB 1034 would allow a state agency to issue an order that assesses a civil penalty against a person who knowingly and willfully excavates upon, or removes, destroys, injures, or defaces archaeological resources on public lands. The bill would establish procedures for the assessment of the civil penalty, including procedures for determining the commercial and archaeological value of those resources and cost of restoration. The bill would also authorize the forfeiture of the archaeological resources that were the subject of the violation and the vehicles and equipment of the person that were used in connection with the violation. The SCA is pleased to sponsor SB 1034 and will be working with State Senator Ducheny and other members of the California Legislature to promote this important piece of legislation.

I hope to see many of you in Riverside later this month!

Poster designed by Marie Andersen

Riverside is rich in history and this guide is a comprehensive list of historic sites in downtown Riverside including a walking map. It includes drawings by renowned artist, Marty Tobias.

Download the map for free at:

http://riversidedowntown.org/files/RDP_Walking_Map_427.pdf

Riverside's friendly Downtown Ambassadors are on hand seven days a week patrolling downtown Riverside. They provide useful information and directions to downtown visitors, as well as patrol the downtown parking garages and parking lots for security purposes.

COMMITTEE REPORTS

Native American Programs Report

Submitted by Janet Eidsness

SCA Annual Meeting in Riverside will feature a number of sessions featuring California Indian perspectives, knowledge and information; among them...

Thursday, March 18, 9-11 a.m.

Plenary Session (on Curation issue), including Native scholars & speakers Gregg Castro (Rumsien Ohlone), Cindi Alvitre (Tongva), Desiree Martinez (Gabrielino/Tongva), Anthony Madrigal (Cahuilla), Pattie Garcia Tuck (THPO for Agua Caliente Band of Cahuilla), among others...

Thursday, March 18, 1-2 p.m.

Closed meeting of Riverside County reps of Inter-Tribal Cultural Resources Working Group followed at 2-3 p.m. by open meeting for all interested Tribal people to address Archaeology and Curation Standards and Practices, Cultural Sensitivity, and Riverside County Cultural Resources Certification

Thursday, March 18, 3-4:30 p.m.

Open Meeting of the SCA Native American Programs Committee

Friday, March 19, 8-9:15 a.m.

Meet the California THPOs

Friday, March 19, 9:30-10:30 a.m.

Preston Arrow-weed (Quechan) hosts video documentary on protecting sacred places, "Journey from Spirit Mountain"

Saturday, March 20, 8-Noon

Salt Song Trail session, with Native guests from southern California and Arizona

Plus a whole lot more!

SCA Native American Programs Committee is happy to announce the award of five full sponsorships to California Indians for this year's meeting:

Brandy Doering (Maidu)
Mary Rodgers (Salinan)
Francine Martinez (Salinan)
Preston Arrow-weed (Quechan)
Suntayea Steinruck (Tolowa)

Please offer support to four Native guests coming from Arizona to speak on the Salt Song Trail Saturday morning. Thanks to SCA members for their support and donations to this program!

COMMITTEE REPORTS, CONTINUED

CASSP Committee Report Submitted by Beth and Chris Padon

Site stewards visit an archaeological site during the second day of the volunteer training workshop in August, 2009. Linn Gassaway (center) speaks about the site's features.

California Archaeological Site Stewardship Program (CASSP) held three initial training volunteer workshops during the last half of 2009. US Forest Service (USFS) archaeologist Linn Gassaway hosted a workshop in August at the Sequoia National Forest, Hume Lake Ranger District. San Bernardino National Forest archaeologist Bill Sapp, with USFS archaeologists Travis Mason and Gina Griffith, hosted a workshop in September in San Bernardino. State Parks archaeologists, Kelly Long and Alicia Perez, hosted the most recent workshop in December at the California State Office of the Bureau of Land Management (BLM) in Sacramento and the Carnegie State Vehicular Recreation Area near Tracy. A total of 52 new volunteers and six site steward alumni attended these workshops. Thanks to the archaeologists and volunteers for great workshops.

Site stewards also participated in three advanced workshops. Advanced workshops provide additional, focused training for site stewards who have already taken the initial volunteer training. There was exceptional volunteer enthusiasm and impressive professionalism from the archaeologists at all of these advanced workshops.

In October, BLM archaeologists Kirk Halford and Greg Haverstock and USFS archaeologist William Kerwin conducted a GPS and GIS advanced

workshop at the Bishop BLM Field Office. Eleven site stewards learned about the use of their GPS units and how these field data aid the management of cultural resources for the BLM. In early November, State Parks archaeologist Leslie Steidl, with Greg White (archaeologist with Pacific Legacy, Inc.) and Mike Newland (archaeologist with Anthropological Studies Center, Sonoma State University) led the advanced workshop at Anderson Marsh State Historic Park. Fifteen site stewards participated by relocating and surveying a large prehistoric site. In February, USFS archaeologists Jamie Moore and Mary Kliejunas led a workshop in stone tool identification at the Plumas National Forest Feather River Ranger District office in Oroville, California. Eighteen site stewards measured and cataloged several hundred items from an Archaeological Resources Protection Act collection during two days of work. Christina Weinberg, Wendy Parker, Doug Baughman, and Alden Neel, all archaeologists at the Plumas National Forest, provided valuable assistance and guidance.

The SCA annual meeting in Riverside will include several site stewardship events. Stephen Horne organized a symposium on "Site Stewardship Programs: Where Have We Been and Where Will We Go?" (Friday afternoon) and Kathleen Lindahl organized a symposium on, "Site Preservation and Stewardship" (Saturday morning). The Site Stewardship Committee meeting will be held at noon, Friday; everyone is welcome.

Past and current workshop participants joined State Parks personnel for a fieldtrip at Carnegie State Vehicular Recreation Area.

LIAISON REPORTS

Legislative Liaison Report

Submitted by Stephen Bryne

Federal Government News

The second session of the 111th Congress officially began on Jan. 1, 2010. The health care reform debate was put on hold after the result of the Massachusetts election ended the Democrat's filibuster-proof majority in the Senate. The federal deficit reflects the continued fallout from a deep recession and a severe financial crisis. The Treasury Department said that the deficit for January totaled \$42.63 billion. President Obama forecast the 2011 deficit, for the budget year that begins next October 1 would total \$1.27 trillion. The substantial expected deficit during a time of continued economic recession could result in further cuts in many federal programs.

The first Presidential Budget of the Obama Administration for fiscal year (FY) 2011 was a disappointment to the historic preservation community. Last year's appropriation for preservation totaled \$79.5 million. The Obama preservation budget cut \$29.5 million for a total of \$54.5 million in FY2011. Funding for the National Conference of Historic Preservation Offices remained at the FY2010 level of \$46.5 million and the Tribal Preservation Offices remained at the \$8 million level. Two other successful preservation programs – Save America's Treasures and Preserve America – were zeroed out and another related program – National Heritage Areas – was halved from last year's level of \$18 million to \$9 million.

This is the first time since the 1980s that preservation programs have seen such a drastic cut in federal funding.

The loss of funding for Save America's Treasures would end the nation's primary bricks and mortar matching grant program. This program has preserved more than 900 significant historic places in all 50 States. This is a matching grants program; that is, all projects have raised matching funds from public and private resources.

Federal Legislation

H.R. 1612—Public Lands Service Corps Act of 2009

Sponsor—Rep. Grijalva (D-AZ)

This legislation would rename the existing Public Lands Corps, to the Public Lands Service Corps, and expand its mission. The bill would provide the Departments of Interior, Agriculture, and Commerce with more financial resources to recruit personnel, in particular, at-risk youth, to train and carry out rehabilitation programs on federal lands. The legislation would update and expand the types of projects that would qualify for funding to specifically include cultural, historic, and archaeological resources. The Senate version of this bill, SB 1442, is pending before the Senate Energy and Natural Resources Committee.

State Government News

The big news in California's legislature is the state of the state--specifically, how to close the state's \$19.9 billion deficit. In January, Governor Schwarzenegger called lawmakers into a special session to tackle nearly half the deficit. Senate Democrats want to cut \$5 billion from the current year's budget, leaving deep cuts to social services sought by Schwarzenegger for later in the year. Earlier this month, Senate Democrats unveiled a series of proposals aimed at shoring up the state's economy.

LIAISON REPORTS, CONTINUED

Legislative Liaison Report, Continued

The proposals, which Democrats maintain would create at least 140,000 jobs, rely primarily on high-speed rail, mass transit, and school construction projects made possible by federal funding.

State Legislation

AJR 3—Offshore Oil Drilling

Author—Pedro Nava, D-Santa Barbara

This resolution would request that Congress reinstate the federal offshore oil and gas leasing moratorium and communicates the Legislature's opposition to the proposed expansion of oil and gas drilling off the Pacific Coast. On the very last day of the Bush administration, the Interior Department proposed a new five-year plan for oil and gas leasing on the Outer Continental Shelf (OCS). In 31 lease sales, the plan proposes to lease as much as 300 million acres of the OCS to drilling, including about six million acres off the coast of Humboldt, Mendocino, San Luis Obispo, Santa Barbara, Ventura, Los Angeles, and San Diego counties.

This resolution expresses opposition to any federal energy policies and legislation that would weaken California's legitimate state role in siting energy facilities on state lands. The resolution notes that California's ocean waters are home to four important sanctuaries that are, by definition, areas of special conservation, recreational, ecological, historical, cultural, archaeological, scientific, educational, and aesthetic qualities and are particularly sensitive to the impacts of oil development.

This resolution is in response to Governor Schwarzenegger's budget proposal that calls for the resurrection of a controversial deal to allow offshore drilling at Tranquillon Ridge, off the coast from Vandenberg Air Force Base. Last year, the State Lands Commission voted this proposal down. The project would allow the first new drilling in the state since the 1969 Santa Barbara oil spill. That event resulted in the spillage of 3,200,000 gallons of crude oil that fouled Santa Barbara County's ocean beaches. Californians became even more wary about offshore oil drilling, resulting in the passage of additional oil and gas leasing prohibitions in 1969, 1970, and 1971. State assemblyman Pedro Nava is the legislature's leading critic of the proposed Tranquillon Ridge project.

Former state assemblywoman Hannah-Beth Jackson, long a fierce crusader against new offshore oil drilling in California, has become a paid consultant to a Santa Barbara group advocating for the drilling project. Sara Wan, founder of the Vote the Coast environmental group and a longtime member of the Coastal Commission, called the agreement between Jackson and the group "very disturbing."

LIAISON REPORTS, CONTINUED

Information Center Liaison Report

Submitted by Amy Huberland

CHRIS Questionnaire

As part of their continuous effort to enhance capability and efficiency, the State Office of Historic Preservation (OHP) and the eleven Information Centers (ICs) of the California Historical Resources Information System (CHRIS) have distributed a questionnaire (the *California Historical Resources Information System User Survey*) to their clients to identify areas for improvement in Information Center products and services. This survey is being administered by the Institute for Social Research (ISR) at California State University, Sacramento on behalf of the CHRIS. The results of this survey will be submitted in a report to the CHRIS and utilized as a foundation for improving customer service.

CHRIS GIS and Electronic Conversion Status

Both the CHRIS Information Centers and OHP are faced with the daunting task of converting more than 500,000 historical resources properties in California, and a library of well over 20 million pages of text hardcopy, into digital/electronic format. In the past few years some real progress has been made towards digitizing resource and report locations, compiling resource and report databases, and scanning records and reports to electronic format. In addition, the ICs and OHP are currently discussing GIS standards for the CHRIS as well as standards for submittal of digital and electronic data to the ICs. Following are summaries of the status of OHP and the individual ICs regarding this undertaking.

Office of Historic Preservation:

OHP plans to have its new database and GIS application, OTIS, up and running this summer. All of OHP's inventory will be moved to this new system by then, and some will be in GIS format. Additionally, and importantly, the new system and data exchange standards between OHP and the ICs will improve the speed at which OHP's inventory is processed and made available at the ICs.

Northwest Information Center, Rohnert Park (NWIC):

The Northwest Information Center is embarking on a journey into unknown territory – we are beginning a

service for clients that will allow them to conduct their own in-house electronic records searches using our NWIC GIS and Electronic Database Application. Electronic records search information is available in four counties: Marin, Alameda, Contra Costa, and San Francisco, and very shortly Solano and San Mateo will be added to this list. The NWIC Application will easily allow clients to produce PDF records search maps of varying scales that depict resource and report locations; to copy PDF records and report files; to produce a database bibliographic list or detail print-outs; and to reproduce any other available electronically formatted information, such as the OHP Historic Properties Directory, historic-period maps, etc. Each consultant who wishes to use this service will participate in one of two training workshops being offered at the end of February and beginning of March. In anticipation of increasing use of this service, the NWIC will add an additional appointment day: beginning 15 April 2010, along with Wednesday and Thursday, which are dedicated to large project records searches, Tuesday will now be an Appointment-Only day with six two-hour appointment slots, primarily dedicated to electronic in-house searches.

North Central Information Center, Sacramento (NCIC):

At the North Central Information Center, we are now able to offer fully electronic record searches for our resource and report inventory for Sacramento County, and we will be able to conduct electronic record searches for Placer County in the very near future. We have also commenced digitization work for records pertaining to Yuba County. Much of the records from our remaining counties have also been digitized, but require analysis and completion.

Central Coast Information Center, Santa Barbara (CCIC):

The Central Coast Information Center is currently offering 100% digital services for full service records searches. In-house records searches are currently still conducted on paper maps, but we are in the process of adapting a new GIS system that will allow our in-house clients to conduct record searches using the GIS data. The new system should be in place by the end of 2010.

LIAISON REPORTS, CONTINUED

Information Center Liaison Report, continued

San Bernardino Archaeological Information Center (SBAIC):

The SBAIC has had all pre-2001 AutoCad data scanned into ArcGIS files and once these have been checked and rectified, will add the additional records and reports that have come in since 2001.

Eastern Information Center, Riverside (EIC):

For the past two years, the EIC has been engaged in an intensive program to convert all of its paper-based spatial and text information files to digital formats. It is anticipated that the transition to fully electronic operations will be achieved for at least one, and perhaps all, of the three counties the EIC serves within this calendar year.

Northeast Information Center, Chico (NEIC):

Currently, 125 of the 660 NEIC base maps (resources and reports) have been completely converted to GIS format, and at this time, record search locations which fall within those quadrangle maps are being conducted electronically (including all of Sutter and most of Butte and Glenn counties). Funding from various state and federal agencies has also supported the conversion of an additional 200 resource location maps across the 11 NEIC counties, leaving approximately 250 resource location maps and 450 report location maps yet to digitize. All resource records for the counties of Butte, Glenn, and Sutter have been scanned and are available as PDFs. *At this time all new resource records and reports that are received by the NEIC are being digitized into the GIS database.* The resource database is complete for all 11 counties and the report bibliography is 75% complete (covering Butte, Glenn, Lassen, Modoc, Plumas, Sierra, Sutter, and Tehama counties). For in-house researchers, only hard copy records searches are currently available.

Central California Information Center, Stanislaus (CCIC):

The Central California Information Center is currently updating digitized quads completed as part of the Natural Resources Conservation Service contract, nearing completion of the digitized map portion for Stanislaus County. The CCIC cannot offer electronic

records search services as yet. We are soon to begin entering resource database information for Stanislaus County.

Southern San Joaquin Valley Information Center, Bakersfield (SSJVIC):

The SSJVIC has been working diligently to scan all documents into PDF format and plot all locations in GIS. To date, we have scanned all the primary records for all five counties (Fresno, Kern, Kings, Madera, Tulare), all reports for Kern County, and about half the reports for Fresno County. We have plotted all Kern County's reports and about half of Kern County's primary records in GIS. We do not currently offer electronic record searches in any county.

South Central Coastal Information Center, Fullerton (SCCIC):

The South Central Coastal Information Center has digitized shapes for nearly all the resource and report inventory for Los Angeles, Orange, and Ventura counties. We are currently putting these data through a rigorous quality control procedure to ensure that they are ready for use in our day-to-day operations.

South Coastal Information Center, San Diego (SCIC):

While we have continued to offer fully electronic record searches and other electronic products for San Diego County, our focus over the last year has been the digitization and incorporation of the former Southeast IC (Imperial County) archive into our system. Through our efforts, we have digitized all site records, mapped all site and report boundaries in GIS, and recently begun offering fully electronic record searches and electronic products for Imperial County.

North Coastal Information Center, Yurok Tribe (NCIC):

The NCIC is looking forward to completing some scanning of records and reports this year. In addition, we will begin training in GIS and with additional funding, look forward to moving forward with our GIS and record scanning projects.

LIAISON REPORTS, CONTINUED

Historical Archaeology News in California

Submitted by Jenny H. Blanchard

Angel Island State Park 100th Anniversary

In January, Angel Island State Park celebrated the 100th anniversary of the Angel Island Immigration Station, which has been an important gateway for immigrants arriving on the west coast of the United States. From 1910-1940, immigrants from 80 countries passed through Angel Island. The Island was especially important for historic immigration of Chinese laborers to California. In celebration, 100 immigrants were sworn in as American citizens. President Obama also signed a proclamation declaring a National Angel Island Day and the importance of the “Ellis Island of the West.”

Volunteers Needed at Columbia State Historic Park

Columbia State Historic Park, located just east of Stockton and Modesto, is looking for volunteers to staff the park. Columbia is a former gold mining town, and the park needs volunteers to help staff facilities, as well as help with historic reenactments. If you are interested in being a part of the living history at Columbia, call Danielle Belluz at (209) 588-9128 or email her at dbelluz@parks.ca.gov

Better Know a Historic Landmark!

In this issue, I would like to introduce the first in a 1041-part series, “Better Know a Historic Landmark!” In each newsletter, I will introduce you to a new historic site listed by the Office of Historic Preservation as a California Historical Landmark, and let you know how you can help support the preservation of California’s historic sites.

Landmark Number 136: The First Theater in California

Located at the corner of Scott and Pacific Streets, Monterey
This small adobe building was built in 1846 and 1847 by Jack Swan, and originally functioned as an inn and tavern for sailors who had come ashore in Monterey Bay. In 1850, it became California’s first theater when soldiers from the US Army’s 1st New York Volunteers put on plays to raise extra money. Soldiers built a platform stage and benches, and lit the makeshift theater with a combination of whale oil lamps and candles. Tickets for the first show cost \$5 apiece. Later uses for the theater included a lodging house for whalers, but after Jack Swan died in 1896, the building fell victim to neglect.

The First Theater, Monterey. Photo courtesy California State Parks.

The First Theater’s life as an historic site began in 1906 when the California Historic Landmarks League bought the building and donated it to the State of California. It is currently a part of Monterey State Historic Park; however, due to structural issues, the inside of the building is currently closed to the public. In fact, due to state budget cuts, all guided walking tours of Monterey State Historic Parks have been cancelled until further notice. You can help support the park financially by booking a private group tour, booking an event in one of the park’s historic gardens, or visiting the Cooper Museum Store.

Rock Art Researchers to Gather in Del Rio, Texas

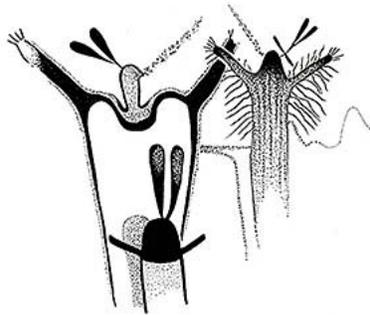

Submitted by Donna Gillette

Del Rio, Texas will be the setting for the 37th annual conference of the American Rock Art Research Association (ARARA), to convene March 26 – 29, 2010. Del Rio is located on the Texas/Mexico border, and is the portal to the Lower Pecos River style of rock art.

A diverse program is planned, exploring the many facets of rock art – prehistoric Native American markings found on stone in natural landscape settings. Presentations on the rock art of southern Texas and beyond, plus a special symposium devoted to discussion of the Red Linear pictograph style will form the heart of the conference. SHUMLA, an international center for archeological research and education, will conduct the exciting field trips offered. A workshop on the D-stretch recording technique; committee meetings focused on education; archives; conservation and publication; a fundraising auction; and the ever popular vendor room that features rock art-related wares and publications for sale are all planned.

ARARA is a diverse community of members dedicated to the preservation, research, and communication of the significance of rock art, which is a non-renewable resource of enduring cultural value, and an important expression of shared human cultural heritage.

For more information about ARARA, please visit: www.arara.org

Historical and Archaeological Investigations of the Hi Good Cabin site (CA-TEH-2105H), a report by Richard Burrill, is now available for free, online at <http://www.ishifacts.com/higood.asp>. The report is a resource reference for archaeologists, historians, museum curators, and enthusiasts of Butte, Plumas, Shasta, and Tehama county histories. For a hard copy of the report, please contact:
